

Inquiry, Critical Thinking, Communication, The Diversity of Human Experience, Ethics, and Social Responsibility play very important roles at Symmetry Chiropractic.

For **inquiry and critical thinking**, we establish a treatment plan for patients with what will work for them specifically.

Communication is most important, we must communicate with patients to ensure the treatment plan is working for their specific needs.

There is a **diversity of human experience**, every patient is different and experiences things differently. We respect and acknowledge that so we allow patients to be who they are and make no judgments.

Ethics and social responsibility are key at Symmetry Chiropractic. We follow HIPPA Guidelines and guarantee the patient's information is not shared with absolutely anyone. We owe it to our patients to be ethical and responsible in all that we do.
